Re: WT Docket 11-65

Dear Chairman Genachowski and Commissioners:

The Wichita Hispanic Chamber strongly supports the proposed merger between AT&T and T-Mobile, and I write to urge you to do the same.

As we work to expand opportunity for Hispanic businesses and entrepreneurs in the Wichita area, we know that crucial to success is increasing access to technology and information. This proposed merger will improve voice and data service quality, bringing more information to more people faster than ever before. This will be great for Hispanic businesses not only in Wichita, but the entire state of Kansas.

Historically, one of the greatest hurdles for Hispanic business development has been access to the same type of technology as more established businesses. Our businesses and business owners have worked hard to succeed on a field that is not level. But the merger between AT&T and T-Mobile would result in the type of transformational build out of wireless broadband technology that would give all businesses the same opportunity to develop and succeed.

On behalf of Hispanic businesses in Wichita and across the country, I urge you to approve this merger, because it will help to provide the type of opportunity everyone who wants to start their own business deserves.

Sincerely,

Abel Perez, Executive Director
Wichita Hispanic Chamber of Commerce
